

LYNX POWER 3

EMERGENCY ELEVATOR INVERTER

KEEP THE ELEVATORS "ON" WHEN YOU NEED THEM THE MOST

THREE PHASE 5 KVA - 80 KVA

Extreme power factor rated. Made to handle elevators starting and stopping when batteries are the only source of power. The LP3 is designed to absorb elevator regeneration energy when operating on battery power during a utility outage without adding other equipment. Under normal operation, when the utility power is available, the regeneration energy is absorbed in the normal building loads.
